

## Cast Slab Table

Various dimensions

Solid cast bronze or aluminum legs and salvaged wood slab top

Custom sizes, woods, finishes, and leg styles are available

The legs of these tables are sculpted out of plaster by the designer and later cast in solid bronze. The wood is selected from sources of diseased or storm-felled trees and the fabrication is closely overseen to capture a unique spirit in each piece.

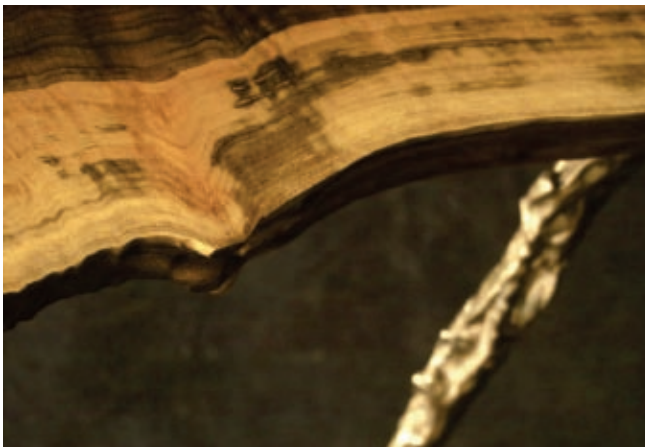

Signed and dated

Fabricated in California

"The Black Walnut slab was an obvious first choice of table top to use with the Briar Cast Legs, as much of my inspiration for sculpting those legs came from the old trees and vegetation along the Sacramento River."
